In this guide, you'll learn how to add audio pages on Foxxi..

Go to Projects, click Audio..

Click Add New..

If you have an audio file, you want to convert to speech you can upload that here..

You can add the blog URL here to extract a Blog content and convert them into speech..

Or you can paste and convert any text to speech..

In this demo, we are going to try text to speech..

Copy and paste the text here..

You can choose language and choose male or female voice..

Choose pitch and volume..

After that, click create..

Now the audio have been added successfully..
